# SAFETY

## Italy

### Oceanic

The most evolved product in Italy (new MD 12/08/2002 n. 219), thanks to its maximum safety, for pleasure sailors. It is available in rigid or valise-fabric containers. It complies with MD 12/08/2002 n. 219, and its use is compulsory on board of pleasure units that fly the Italian flag and navigating beyond 12 miles from the coast.

## Greece

Liferaft line that is designed for the Greek market, in compliance with the standards in force. It is available both with rigid and valise-fabric containers.

## Spain

### Iberica 01

Liferaft line that is designed for the Spanish market, in compliance with the standards in force (cat. B "Zone 2 and 3" / pleasure navigation – project ISO/DIS 9650-1y3:2003). It is available both with rigid and valise-fabric containers. This line is also type-tested for the Croatian II navigation category.

## France

### Europe

Line of life-rafts homologated under the French regulation and conform to the ISO 9650 standard.

The range consists of 3 models: Inshore (type 2 – for costal use), Offshore Limited (type 1-24 hours – for deep sea navigation, but characterised by a limited survival kit) and Offshore (type 1-24 hours – for deep sea navigation with complete survival equipment). By placing a separate equipment bag aside – Grab Bag – the Offshore Limited can substitute the Offshore for the same class of navigation. All models are available in rigid container or in tissue

## Croatia

### International HR

Liferaft line that is designed for the Croatian market, for the III navigation category, in compliance with the standards in force. It is available both with rigid and valise-fabric containers.

## International

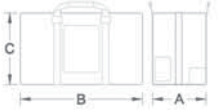

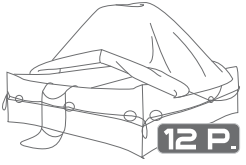

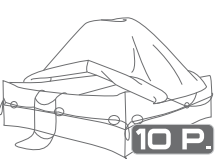

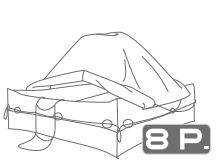

### International

It is a compact and light "basic" liferaft. The International range includes inflatable liferafts whose size varies from 4- to 12-person. As its emergency equipment pack is reduced, it is suitable for coastal navigation.

### Int. Offshore

More complete equipment for most demanding navigations. They are particularly suitable to be used in cold climates thanks to the thermal insulated floor.

*The new inox deck support (optional).*

*The soft valise.*

*The rigid container.*

Arimar's range of inflatable liferafts includes models with basic equipment and solutions, as well as models that are equipped with additional accessories to comply with the strictest international standards and to offer a high safety level to the people who have to face extremely treacherous navigations. Arimar's inflatable liferafts are characterised by reduced size and weight, being held hermetically into rigid capsule-containers or valise fabric containers equipped with practical transport handles.

The liferafts are manufactured in bright colours, which can be easily sighted even in case of reduced visibility. In addition, they are equipped with wide entrances to facilitate rescue operations, and assure shelter from the inclemency of weather and great stability even in bad weather conditions.

All products, from small floating devices up to big liferafts that are designed for aircraft rescuing, are manufactured according to processes that comply with the standards established by the UNI EN ISO 9001:2000 certified quality system issued by Tuv Italia. Furthermore, several products within this range achieved approvals by the competent Ministries, as well as type-approvals by military bodies.

The inflatable liferafts must be periodically serviced by the company or authorised workshops to assure maximum reliability. They are manufactured by complying with the strictest standards, and are essential safety elements during navigation.

# LIFEJACKETS

## Specifications

Available inflation systems: only manual or manual and automatic with soluble capsule. The automatic model may replace aboard, in accordance with CE rules, the classical lifejacket. Inflation with CO2 gas cylinder.

The lifejacket is provided with harness, predisposed to use with safety tether (not included). Suitable for over 50 kg wearers with a max 120 cm chest circumference.

## 150N Models

"SEASTAR" Orange - manual	480.281
"SEASTAR" Blue - automatic	480.280
"SEASTAR" Orange - automatic	480.283

## Spare parts

Manual: cylinder + firing head	480.99 Km
Automatic: cylinder + firing head + water soluble capsule	480.99 Km
Water soluble capsule	480.99 Km

Arimar's 150N CE life jackets assure the highest safety level established for rescue devices. The advanced technologies being used make them effective and functional in every situation. Arimar's life jackets are manufactured in bright colours that can be easily sighted; all details are looked after, in order to assure an excellent comfort, too.

The release system is different according to the specific needs of the sailor. The version that is equipped with automatic release allows instant inflation at the time of immersion into the water, even if it is still possible to carry out the manual inflation by means of a tear-off handle.

# FLOATING DEVICES

Seacurity floating devices, which are manufactured in the 6-, 8-, 10- and 12-person versions, comply with the type that was approved for recreational purposes by the Ministry of Transport and Navigation, in compliance with M.D. 412 dated 29/09/1999. They are an important safety element; they become operational in a few seconds and can be easily stowed. They must be compulsorily used on board of pleasure units that fly the Italian flag and that navigate between 6 and 12 miles from the coast.

## Italy

Floating Device mod. "Tekno"

Capacity	Size	Weight
6	39x26x18h	6,5
8	39x26x18h	6,5
10	39x26x20h	8
12	39x26x20h	8
